The specification is objected to for minor informalities. For example, 22a, 22b is used to refer to the pilot passages while the drawings show 23a, 23b, see paragraphs 41 and 44, and paragraph 46 refers to spurs 24 which is also used for interface 24, see spurs 34 in the drawings.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Neither the specification nor the drawings enablingly explain the flow path from ports 20, 21 to the channels 17, 18a, 18b or how the control element 25 controls flow between the channels 22, 23a, 23b.
